

Thursday, 8 Sept 2022

This free resume critique is intended to give you an honest, straightforward assessment, and some suggestions to help you in your job search.

file name

File is named SALAHU AHMED CV-3 (1). It is a good practice to have your first and last name in the file name of your resume. Email clients can mark generic file names as suspicious. Adding your name ensures your resume will be found easily and assigned to the right application.

file size

Recorded file size is 293.10 kB

The file is too large. We recommend removing any custom background images or formatting elements as you did, or resolving it in a different format setting that will allow for file compression.

word count

The resume contains 416 words (approx.). The total word-count accessed falls within the recommended range.

page count

The resume is 2 pages long which is the recommended number of pages required in a standard resume. It is important to nail the right resume length. More than 2 pages and the recruiter will not read through your resume, whereas, if it is too short, it will undersell you.

social links

The file contains a LinkedIn link. Having a professional LinkedIn profile will significantly improve your chances of getting an interview.

grammar check

The resume file has no spelling errors. Using the right verbs, adjectives and adverbs will help boost the quality and grammatical makeup of sentences. Try to use British English when constructing words and always add the full meaning of abbreviations. Having a resume devoid of grammatical errors will prevent it from getting flagged by ATS

required sections

The file contains the required sections. A well-organized resume that includes the appropriate elements and information can get a hiring manager's attention and help you earn a job interview.

**ats** You scored below the mark that should move your file on to a human recruiter. Your ATS score is 40%. A score of 80% or higher moves your file to the next stage in the recruitment process. ATS looks for, and awards percentage points to specific instances of a word and in

specific amounts.
