

# **CV REVIEW FOR HARRY AKHALUODE**

## **File Name**

Your resume file is named HARRY AKHALUODE

It is a good practice to have your first and last name in the file name of your resume. Email clients can mark generic file names as suspicious. Adding your name ensures your resume will be found easy and assigned to the right application.

## **File Size**

Your resume file size is 25.43 KiB

Great! This is within the recommended size and may avoid upload problems.

The common file size limit for website uploads is under 2mB. If your resume is too large, we recommend removing any custom background images or formatting elements as you did, or resolving it in a different format setting that will allow for file compression.

## **Word Count**

Your resume contains 622 words

This is the number of words we found in your resume. Try to always keep it between 400 and 800 words. Generally, over 800 words is considered too long a resume. (more than 2 pages or too crammed), and less than 400 words is too short or empty.

## **Page Count**

Your resume is 3 pages long

Great! This is longer than the recommended page count for a resume of your years of experience.

It is important to nail the right resume length. More than two pages and the recruiter won't read through your resume, whereas, if it is too short, it will undersell you.
